

BELLTOWNPOWER

# Invitation to a Public Exhibition

## Newlands Hill Wind Energy Hub

We are facing an unprecedented global climate crisis caused by the use of fossil fuels to power our societies. We need to urgently cut greenhouse gas emissions to prevent potentially irreversible temperature rises and nature loss. Belltown Power is developing the proposed Newlands Hill Wind Energy Hub, 6km southeast of Gifford.

We fundamentally believe that as well as tackling climate change renewable energy projects should materially benefit the communities that host them and have developed a groundbreaking community ownership scheme that genuinely enables host communities to own part of the development.

We are inviting local residents, businesses and community groups to join us at our exhibition to:

- find out more about our proposal
- provide feedback so we can develop the proposal in the best way possible
- find out how a wind energy hub could benefit your community.

### Virtual Exhibition 8–28 March

All exhibition material will be available from **8 March**. In the meantime do please visit our webpage at [www.belltownpower.com/uk/newlandshill](http://www.belltownpower.com/uk/newlandshill) and ask any questions, provide feedback or request a call back by emailing the team at [newlandshill@belltownpower.com](mailto:newlandshill@belltownpower.com)

### Physical Exhibitions

- Garvald Village Hall  
Tue 15 March, 1–8pm
- Gifford Village Hall  
Wed 16 March, 1–8pm

The physical exhibitions will follow relevant Covid-19 guidelines.

**Come join us at one of these events and see how your community can contribute to tackling climate change in a significant way through hosting and part-owning a modern wind energy hub.**
